# exposa®

DECORATIVE CONCRETE

Exposed aggregate concrete offers a durable and aesthetically pleasing alternative to not only plain concrete, but also traditional paving, asphalt and loose gravel. It is a durable, slip resistant finish ideal for outdoor surfaces, including driveways, footpaths, promenades, town centres and pedestrian zones.

The **exposa**® range comes in a wide variety of colours and textures, offering the designer a multitude of combinations. It sits well within a rustic setting as well as a modern minimalist environment complementing the surrounding landscape.

# benefits

## beautiful

Create a visually striking surface, using **exposa®**. Our wide variety of rich colours and textures will provide a stunning finish in harmony with the surrounding landscape.

## durable

A natural aggregate finish with the durability and structural integrity of concrete. **exposa®** is designed to withstand heavy traffic and weather extremes without sinking or heaving.

## practical

Combine an attractive natural surface with the beauty of a low maintenance finish. The unique characteristics of **exposa®** inhibits the proliferation of weeds and moss.

## safe

Enhanced comfort underfoot. **exposa®** is naturally slip-resistant and is laid as a continuous surface thus reducing trip hazards.

## flexible

Customise your design to create a bold or subtle effect. Choose from a wide range of different finishes to shape your space – straight or curved or anything in between.

Residential Project, Golden Barley 01

RTU manufactures **exposa®** decorative concrete under stringent quality control procedures ensuring conformity to the requirements of BS EN206.

**exposa®** is installed by RTU approved installers ensuring quality workmanship and attention to detail.

## Colours

Linen White 00

Tuscan Pebble 01

Golden Barley 01

Cottage Sands 01

Portstewart Promenade, Amber Beach 01 and Autumn Sunset 31  
Concrete Society Award Winner 2016 for Environmental Improvements at Portstewart Promenade.

Our standard range is illustrated below, however the depth of exposure, aggregate choice and colour can be tailored to your individual requirements. Various styles can be used in one project to complement or contrast each other or the surrounding environment. Other materials such as cobble or paving stones may be positioned as movement joints or to form a border. This will create a stunning effect when combined with **exposa®**.

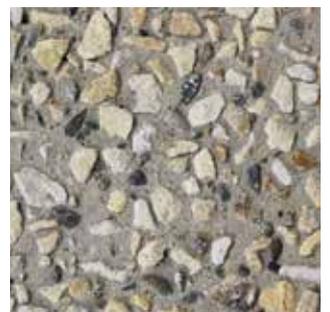

Savage Ground 51

Pavilion Grey 91

Autumn Sunset 31

Amber Beach 01

# about us

V36 Valley Park Leisure Centre, Amber Beach 01

RTU is a market leading manufacturer of concrete, mortar, and floor screeding products. Our reputation for excellence within the industry is founded on product quality, attention to detail and superior service. Whatever the nature or size of the project, clients know they can rely on RTU.
